

Now is your opportunity to check your knowledge of what you have learned so far. Please complete the following quiz and don't forget to click the submit button once you have selected all of your answers.

1. Which network topology provides redundant connections between devices, ensuring multiple paths for data transmission?

1 point

- ☐ Bus topology
- ☐ Star topology
- ☐ Ring topology
- ☒ Mesh topology

2. Which network topology uses a central device that connects all devices in a star-like fashion?

1 point

- ☐ Bus topology
- ☒ Star topology
- ☐ Ring topology
- ☐ Mesh topology
